

Student name: Jianchang Li

What was the most challenging piece of this assignment? Did you find it easy or challenging to work with HTML and CSS? How long did this overall assignment take you?

1. Adjusting the images, logo, and SVGs to fit the page layout properly and ensuring they displayed well on different screen sizes.
2. I think it was moderately challenging. Basic HTML and CSS are easy to work with, but some layouts and designs add complexity.
3. The entire assignment took approximately one week to complete, including designing, coding and testing.

What decisions did you make when you made your site mobile friendly?

1. Used media queries to adjust layouts for smaller screens, stacking elements vertically.
2. Reduced font sizes, margins, and padding for better fit.
3. Scaled grids and images to fit smaller screens using responsive sizing.
4. Adjusted navigation to a compact vertical layout.

What did you take into account when you developed the *design* of your website? Is there anything that you're particularly proud of?

1. First of course user-friendly: Ensured the navigation bar is clear and accessible on all devices.
2. Second is the responsive design: Used media queries to make the site mobile-friendly.
3. Color layout: Maintained a cohesive color scheme and font selection to create a better appearance.
4. Hover accessibility: Add hover for images and SVGs.

Proud of:

1. Easter Egg: When the user hovers over the left top corners, it shows a unique move and links to my profile.
2. Response design for my website.
3. Added warship model images in header and footer!

Given more time or resources, what additional features would you add to your site in the future?

1. Tutorial: Add a beginner's tutorial to guide new players through the rules and gameplay mechanics.
2. Live timer: Track how long each match lasts.
3. Hint: Suggest potential moves for players.

4. Customizable Boards: Allow players to customize their own games (board color, size, theme, etc.)

5. Sound: Add sound effects for movement like hits, misses, and victories.

How many hours did you spend on this assignment?

About 25 hours.

If you used code or design from somewhere online, please mention it here. Furthermore, if you imported a file to use a Fonts or Icons library, please indicate that here as well.

Fonts:

Fonts were imported from [Google Fonts](#):

Roboto (used for general text and body content).

Pacifico (used for the logo and headings).

Lato (used for sections like "Rules" and "High Scores").

Icons:

Svg Icons (e.g., home, rules, game and highscores) were used from <http://www.w3.org>
